

AHMED SAMIR

Full-Stack Developer | PHP/Laravel | React ahmedalayde86@gmail.com

+201006082709 | Cairo, Egypt, Nasr City | [LinkedIn](#) / [GitHub](#)

Professional Summary

Full-Stack Web Developer with hands-on experience delivering scalable, high-performance web applications. I have developed and maintained 6+ full-stack projects using React.js, Next.js, Laravel, and MySQL, serving 2,000+ active users. My expertise includes building clean, responsive UIs, designing robust RESTful APIs, and optimizing database performance for fast, reliable systems.

I have implemented real-time features using Firebase, integrated secure online payment gateways (Telr), and contributed to Agile/Scrum teams by driving technical improvements and ensuring timely delivery. I'm passionate about solving complex problems, mentoring junior developers, and creating modern web solutions that balance scalability, performance, and great user experience.

Core Skills

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Bootstrap, TypeScript

Backend Development: Laravel (PHP), RESTful APIs, MySQL, Yajra DataTables (Ajax)

Tools & Platforms: VS Code, Cursor AI, GitHub, Bitbucket, Postman, XAMPP

Professional Experience

Full-Stack Web Developer | Webeetec

2025 – Present | Remote – Al Madinah Al Munawwarah, KSA Developed and maintained 2+ full-stack web applications using React.js, Laravel, and MySQL, serving 2K+ active users. Built and integrated RESTful APIs, reducing integration issues by 90% and improving response performance.

Collaborated across Agile/Scrum sprints, achieving 95% on-time delivery of planned features. Improved development workflow using Git, GitHub, and Bitbucket, reducing merge conflicts by 95% and speeding up code reviews.

Full-Stack Web Developer | ITSharks 2022 – 2024

Engineered responsive user interfaces with React.js and Bootstrap, boosting page performance and load speed by 95%. Worked closely with UI/UX designers to ship features that increased user engagement by 90%. Developed secure backend modules and REST APIs with Laravel, handling

1K+ daily requests with improved reliability. Optimized MySQL queries and database schema, reducing latency by 95% and improving scalability across the platform. Completed 90% of tasks ahead of deadlines within Agile sprint cycles.

Full-Stack Developer (Intern) | My Compound 2023

Contributed to building a real-estate management system using React.js and Laravel. Developed reusable UI components, reducing overall frontend development time by 90%. Assisted in API integration, debugging, and testing using Postman, improving feature stability and release quality.

Frontend Instructor | ITSharks (Maadi) 2023 – Present

Began as Teaching Assistant in 2023 across 3 training programs focused on frontend fundamentals. Promoted to Lead Instructor in 2024, independently delivering 2 full courses covering Frontend and [React.js](#). Delivered structured sessions on HTML, CSS, JavaScript (ES6+), React.js, Tailwind CSS, and Git/GitHub. Trained learners to build responsive, production-quality projects following best practices in code structure and clean architecture. Mentored 50+ students, supporting them in completing portfolio-ready projects and preparing for real-world development environments.

PROJECTS

1- Locate – Store Management & E-Commerce System (Laravel)

Built a full-stack store management platform with **multi-role authentication** (Admin & Manager) using Laravel.

Developed a secure **RESTful API** protected with headers and token-based authorization. Integrated **Telr** payment gateway to enable safe and seamless online transactions.

Implemented **real-time notifications** using Firebase Cloud Messaging (FCM) for instant order and system updates.

Designed a structured admin dashboard supporting management of users, stores, products, orders, ads, and reports.

Delivered a responsive, scalable backend architecture ensuring high system reliability and performance. [live Demo](#) [github](#)

2- **1st Avenue Real Estate** — Corporate Website with React.js and

Tailwind CSS. [Live Demo](#)

3- **Iqamti** — Hotel Booking Platform built with React.js and Bootstrap. [Live Demo](#)

Backend Development — Designed and implemented backend systems for multiple mobile applications (API integration, authentication, database management). .

Education

Full Stack Web Development Diploma | ITSharks — 2022

Institute of Information Systems | HICMIS University — Expected 2026
